

Diesel Technology Trainer (model 600D)

The Diesel Technology Trainer (model 600D) presents the live operation and study of a late model diesel pickup truck. It provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting procedures. Requires (2) 12VDC automotive batteries (included).

Features:

- Diesel Particulate Filter System (DPF)
- Has a fully functional engine, transmission, front brake system (rear lines are sealed), steering system, suspension system, fuel injection system, glow plug system, emission control, instrument panel, front and rear lighting system, and a air conditioning system
- Simulator/Fault Insertion Box for inserting realistic faults into the system
- Compatible with actual service manual test procedures
- Performs DPF regeneration with scan tool
- Portable via rolling casters
- Urea SCR Diesel Exhaust Fluid (select models)
- EGR (select models)
- Diesel Oxidation Catalyst (select models)
